Hogwallow Locals

THE Rye Straw storekeeper says is he had a store as big as a 20-acre field and had it stocked from cellar to garret, the very next morning Atlas Peck's wife would come in and call for something be never heard of.

Miss Hostettes Hocks returned this afternoon from the straw stack with a bundle of straw, and at once began dressing for the party tonight.

The bell on top of the Hog Ford church that has for so long been used to call the congregation together on Sunday, has been dane away with, as nearly everybody knows when Sunday

Life Insurance A Lasting Remembrance

A man died and passed to his reward.

The small sum of money that he had left almost paid his current bills and funeral expenses; he had accumulated no property of consequence—just the average man.

His widow and two small children truly mourned his loss, but realities are far more vivid than dreams, and staring her in the face was the sole responsibility for her two children and the provision of daily bread for three.

Within a few days she assembled all the available assets at her command and called at the Bank to open their safety-deposit

She looked over the few papers therein with little hope, until at the bottom she found a package marked "Remembrance." Affixed to it was a note in which the late husband stated that his love for her would be commemorated by the payment of \$100.00 per month during her entire lifetime, from the proceeds of his small savings which had been invested in the Life Insurance Policy she held, sometimes at loving denial by himself of necessities.

The value of your dollar can only be measured by the result it achieves.

This company has a capital investment of every dollar of its \$750,000.00 capital and surplus-not one dollar for promotion expenses. We have started clean and propose to stay clean. You will always be proud of a policy in the UNITED FIDELITY.

An Automobile should be bought from the inside out, not from the outside in

TOO many cars are bought on looks. They appeal to the eye. So does the Willys-Knight. But it also appeals to the reason. For instead of the ordinary poppet-valve motor, which is simply an anvil under the ceaseless impact of hammering valves. the Quiet Sleeve - Valve Motor operates on a sliding principle and is forever increasing in efficiency.

No valves to grind! No complex mechanism to get out of order! A motor of simplicity, service and negligible maintenance!
